

they will have a dramatic impact on improving the quality of the existing teacher corps. So I hope we will have support for that.

And if we do these things, in addition to the other proposals, I think that we will be doing our part to ensure that we'll have the kind of schools our children need and our country needs, in the 21st century, because it all starts with a teacher like Mr. Moore.

Thank you very much.

NOTE: The President spoke at 12:30 p.m. in the Presidential Hall (formerly Room 450) of the Old Executive Office Building. In his remarks, he referred to Sgt. Arthur Moore, USA (Ret.), teacher, Harlem Park Community School, who introduced the President.

Excerpt From an Interview With Judith Miller and William Broad of the New York Times

January 21, 1999

Senator Dale Bumpers' Senate Impeachment Trial Presentation

Q. We're about to go. Did you have a chance to watch any of Senator Bumpers' presentation today?

The President. I did. It's the only thing I've watched. I watched that.

Q. He said—he criticized the House managers for lacking compassion for your family. He described your family as a family that has been “about as decimated as a family can get. The relationship between husband and wife, father and child, has been incredibly strained if not destroyed.” Is that an accurate representation?

The President. Well, it's been—I would say it has been a strain for my family. But we have worked very hard, and I think we have come through the worst. We love each other very much, and we've worked on it very hard. But I think he was showing—you know, he knows me and Hillary and Chelsea, and we've all been friends, as he said, for 25 years. I think he was just trying to inject a human element into what he was saying.

NOTE: The interview began an approximately 6:30 p.m. in the Oval Office at the White House on January 21 and was made available by the Office of the Press Secretary on January 22. A tape was

not available for verification of the content of this interview.

Remarks at the National Academy of Science

January 22, 1999

Thank you very much. Jamie, Dr. Lederberg, I'd like to thank you for your service in this and so many other ways. I would like to thank Sandy Berger for many things, including indulging my nagging on this subject for the better part of 6 years now.

I was so relieved that Dr. Lederberg, not very long ago—well, last year—brought a distinguished panel of experts together to discuss this bioterrorism threat, because I then had experts to cite for my concern and nobody thought I was just reading too many novels late at night. *[Laughter]*

Madame Attorney General, Secretary Shalala, Secretary Richardson, Director Witt, Deputy Secretary Hamre, Commandant of the Coast Guard and our other military leaders who are here, Mr. Clarke, ladies and gentlemen. I'm delighted to be here to discuss this subject. With some trepidation, Sandy Berger noted that Dr. Lederberg won a Nobel Prize at 33, and I was Governor; you can infer from that that I was not very good at chemistry and biology. *[Laughter]*

But any democracy is imbued with the responsibility of ordinary citizens who do not have extraordinary expertise to meet the challenges of each new age. And that is what we are all trying to do. Our country has always met the challenges of those who would do us harm. At the heart of our national defense I have always believed is our attempt to live by our values, democracy, freedom, equal opportunity. We are working hard to fulfill these values at home. And we are working with nations around the world to advance them, to build a new era of interdependence where nations work together, not simply for peace and security but also for better schools and health care, broader prosperity, a cleaner environment, and a greater involvement by citizens everywhere in shaping their own future.

In the struggle to defend our people and values and to advance them wherever possible, we confront threats both old and new:
